# MAKE YOUR CONNECTION

Through research and development, our LA2 Connected series uses the latest technology, materials and fabrication techniques to create lightweight, long lasting solid-state LED systems. Choose from an array of modular components and material options to create truly limitless combinations, each adaptable to your design goals and ships in just 6-8 weeks.

**SEGMENTS**

**DALLAS RACETRACK**

(16' L X 5' W X 7 3/4" H)

The popular Connected Racetrack creates soft overhead lighting, customizable to any size and color. Seen here in our first Connected install, providing a unique lighting solution for a marketing firm's cafeteria.

**CISION**

(38'7" L X 4'4" W X 5.75" D X 7.75" H)

Drawing your eyes up as you step off the elevator, the LA2 Connected fixture serves a functional wayfinding purpose with design sensibilities.

**SOFTWARE COMPANY**

(18'-4" W X 21'-10" L X 8" H)

Using only three Connected components to develop the Honeycomb shape. The configuration untied a large common area into a cozy, central space for employees.

# THE PERFECT WAYFINDING LIGHTING SYSTEM

LA2 Connected Shapes is custom lighting without the custom cost. Using a standardized kit of parts, you can specify unique configurations tailored to meet the needs of each project and budget.

We know that's important when it comes to wayfinding illumination. That's why we made sure LA2 Connected can curve along corridors, take shape right or left turns, zigzag through hallways or be directional beacons. Because we use 3form's unique EcoResin material and not fabric, our fixtures can be easily cleaned, perfect for hospitals, restaurants or hotels.

Here at LightArt, we love what we do. It is passion that drives us, and that same passion translates into pride. Not only is each fixture handmade with expert precision, but we believe every project, should be truly awe-inspiring.

#### CASE STUDY

## SmithGroupJJR Offices

In the midst of an office expansion, SmithGroupJJR, sought to unify their changing office space and corporate structure with a cohesive design element. Connected proved to be the perfect fit for the project. Its components provided the ability to turn corners, extend down hallways and move throughout conference rooms and open-plan office spaces to marry each section of their workspace.

#### CONNECTING SPACE

As SmithGroupJJR's office broke down into smaller, more distinct studios, their new light fixture helped to visually connect the departments.

## BRAND REINFORCEMENT

Originally specified in white, SmithGroupJJR and Guzman was excited to learn that LightArt could match their branding, which contained a distinct orange bar.

## PLANNING

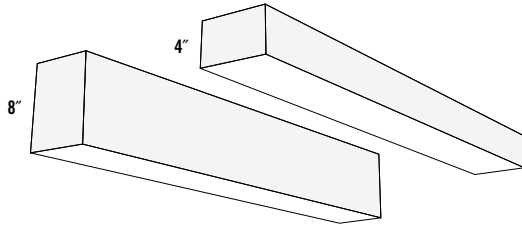

The Connected fixture was built to mimic both the color and shape of that key-branding element, delivering the perfect custom design solution for their desired look and spatial challenge.

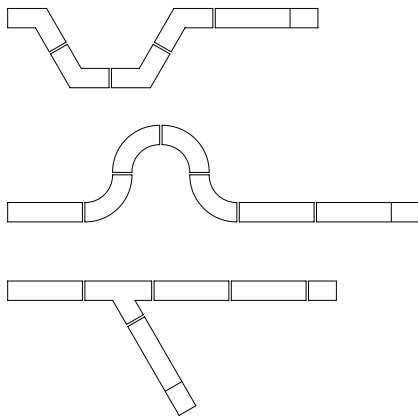

## UNLIMITED POSSIBILITIES

Built with LA2 Technologies, LA2 Connected features the same precision construction, integrated LED system, and vast color options. With seventeen components and over 1,000 color options, the possibilities for LA2 Connected are infinite. Each fixture uses a solid state LED system and is dimming compatible. All products in the LA2 Connected line are CSA approved to UL standards.

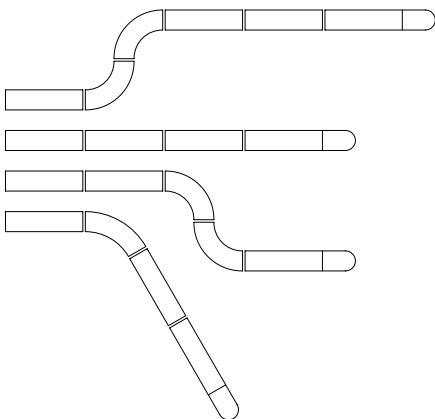

2 SHADE HEIGHTS

POSSIBLE CONFIGURATIONS

ICFF CONFIGURATION

1000+ STANDARD COLORS

MATERIAL

1/16" Varia Ecoresin shade  
3/8" White Opal fully enclosed diffusers  
4" and 8" standard shade height

LIGHTING

Solid State LED system  
Mounts to removable powder coated lid  
120v-277v, 3000k, 81 CRI  
0-10v dimming compatible

HARDWARE

Powder coated canopy  
1/16" stainless steel cables to canopy connection  
Silver power cord  
Hanging height 24"-96"  
Custom heights available

STANDARDS

6-8 week lead time  
UL compliant/CSA approved  
Damp location rated  
5 year limited warranty
