LAB DATA

Echo | NRC = .85 – 1.00

Echo fixtures have a range of NRC values from 0.85 to 1.00, and efficient absorptive components span between fixtures. Echo uses the space between the pendants to maximize sound absorption while minimizing footprint.

Graph illustrates LightArt’s field test results. Contact us for more detailed data.

_____ Grid Count**

Square Grid (SG)

Running Bond (RB)

Triangle Grid (TG)

***Note:** Individual Echo pendants do not need to specify a Grid Type/Count. Grids feature pendants 48" on center.

**For Square Grid, specify Grid Count as "# Rows x # Columns" (Example: "SG 2x2" shown above)

**For Running Bond, specify Grid Count as "# Rows x # Columns" (Example: "RB 2x2" shown above)

**For Triangle Grid, specify Grid Count as "# in Row A + # in Row B, etc." (Example: "TG 2+3" shown above)

**For Custom Grids, specify Grid Count as overall # of Pendants (Example: "CG 10") and provide a reflected ceiling plan showing desired grid configuration. Contact LightArt for more information on Custom Grid options.
